In the specification

Please replace the abstract of the disclosure paragraph on page 28, lines 2-8, with the following paragraph.

An apparatus of one embodiment of the invention is disclosed that includes a number of micro-electromechanical (MEM) devices, a charge source, and at least one discharge path. Each MEM device has a plurality of different states based on a charge induced thereon. The charge source is to induce the charge thereon such that the MEM devices each enter one of the states. The at least one discharge path[[s]] ~~are~~ is for the plurality of MEM devices, and along which the charge induced thereon is dischargeable.
